Types known as "TAYLOR"--- "RED ROSE" -- "STAR" were all taken originally from **WEAVER'S HYBRID BROAD LEAF**-which is the fountain head and a few other types now being used.

GET **WEAVER'S TOBACCO SEED**

SCIENTIFICALLY GROWN AND SEPARATED TOBACCO SEED

For Pennsylvania, Ohio and Wisconsin.

My pure strain of tobacco seed has given universal satisfaction in Pa. Ohio and Wisconsin for the past twenty four years; each year business has increased-many growers have tried other types of seed-only to come back for my scientifically grown and separated seed.

Weaver's Hybrid Broad Leaf- Leader of all
broad leaf types. FOR THE PAST TWENTY FOUR YEARS-
in greater demand than ever.

Weaver's Pa. (early) Narrow Leaf- the best
early narrow leaf known.

I grow SLAUGHTER for those who know it
and want it. & HAVANA

Try **-JOHN S. WEAVER'S** new Hybrid Narrow Leaf, this is an ideal shaped leaf-a medium width- long leaf-very heavy bodied, will stand the vicissitudes of weather conditions during the curing season-better than any of the broad leaf types. It is just wide enough between leaves to cure well. My Hybrid Narrow Leaf is closely related to my Weaver's Hybrid Broad Leaf-it is just the ideal type you are looking for if you want something on the narrow leaf type order.

It is just a little earlier than my Hybrid Broad Leaf. Type not quite fixed
My seed is on sale at the leading merchant in your town-or
